

SOLUTIONS

HONEY PACKAGING

Local and proudly NZ Made.

Here at Kaipak we specialise in the production of premium, NZ made plastic honey packaging solutions. But that's not all that sets us apart. When you partner with Kaipak you work directly with the pulse of honey packaging in NZ - the passionate owners and founders of Kaipak.

Whether you're a honey packer, a boutique food producer, artisan food maker or a small business bottling nutraceutical's, Kaipak has the right solution to meet any and all of your packaging needs.

We've helped kiwi businesses achieve their product packaging needs with consistent precision and we can help yours too!

Our state-of-the-art purpose built production facility provides customers with a total touch-free manufacturing process, utilising robotic technology and in-line quality control.

**DON'T
SETTLE FOR
MEDIOCRITY
BEE EXCELLENT**

Experience the Kaipak difference today!

**NO FAIL NO FUSS
GUARANTEE**

What we do.

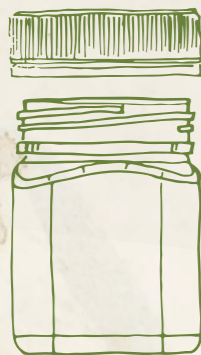

Kaipak has done the impossible. We've taken the traditional honey jar and made it better!

No more worrying about collapsed jars or contaminated products, all our shipments are backed by our exclusive personal guarantee. We safeguard every product against manufacturer defects and work hard to ensure both businesses and consumers get much more than a simple plastic container.

Our packing solutions have been specifically designed for packaging honey products, in both export and the domestic markets.

Creating conceptual designs, to pricing and production, we offer total in-house design and development for all your packaging needs, producing exceptional results rapidly.

Don't settle for less, your business deserves the best, contact Kaipak today.

- Lid available with or without induction seal
- Strong lids that won't pop off
- Softer touch ribs - gentler on hands and machinery
- Positive action tamper evident ring - no fail, no fuss, guaranteed
- Twin start thread for a positive secure closure
- Attractive shoulder design with stronger curvature increases top loading - reduced risk of collapsing or leakage
- Thicker and more prominent wall radius for easy and accurate labelling

A partnership with Kaipak, is a partner in quality.

As an exclusive member of the Kaipak family, your business benefits from our next generation manufacturing facility coupled with Kaipak's unique quality control systems, ensuring you get a premium product every time you order.

As a Kaipak customer, you can take pride in the fact that:

- You receive a personalised service.
- All of our orders are processed with a guaranteed dispatch of 48 hours.
- Access to distribution centers throughout New Zealand, greatly reducing freight costs.
- We offer our clients access to custom colours and designs sure to meet the most sophisticated packaging needs, if required.
- We can work together with you throughout the design process to create and deliver the ultimate packaging solution.

SOLUTIONS DRIVEN

The products we supply.

We think outside the box!

That's why we've taken the standard plastic jar and redesigned it for improved productivity and greater appeal.

At Kaipak we've taken several aspects of the traditional square, hex and round jars and enhanced them for superior quality and comfort.

Looking for a particular design?

Look no further than Kaipak! We're not just innovative, we're design fanatics! Our experts have a wealth of experience in domestic packaging and can provide a solution guaranteed to bring your packaging dreams, to life.

Recycled PET Packaging - rPET.

PET is the most used food packaging material in the world today, and now Kaipak offers its customers a range of high quality food safe, rigid plastic containers made from 100% recycled PET (rPET).

Some of the benefits of rPET:

- It is difficult to see a visible difference in the product.
- Has no loss of function or performance.
- Is processed using the same tooling and moulding equipment.
- Has all the same qualities as virgin PET and meets all applicable food safety standards.

Using rPET is an opportunity for our customers to:

- Share in the public recognition of using recycled plastic.
- Add a clear point of difference and top sustainability position compared to your competition.
- Attract customers who are highly motivated to change their buying behaviour in regards to plastic.
- Take a 'first mover' opportunity in your market and strengthen your position as an environmentally friendly and sustainable brand.
- Be part of circular economy and reduce the amount of waste going to land-fill.

**ALL OUR
JARS ARE
100%
RECYCLABLE**

Our original 'self sealing' lid.

Kaipak is proud present our exciting new self sealing lid.

From concept to reality, this has been an exciting journey to produce a more sustainable packing product. Alongside our commitment to sustainability, innovation is always at the forefront with looking at new and improved design aspects for our honey packaging range.

The benefits of this new lid is extensive:

- Reduced waste from not using the Lift 'n' Peel liner, providing a more sustainable packaging solution for your customer.
- Providing a positive air and moisture sealing of the lid onto the jar.
- Reduced sealing issues within the production facility, less waste and more productivity guaranteed.
- More cost effective packaging by not requiring the induction seal = more savings.

2. Tamper evident 'break' ring ensures product protection.

1. Specifically engineered sealing lip provides full air and moisture barrier.

This creates a positive seal and prevents leakage.
